

**Working together
to help make
Worcestershire
a better and healthier
place to live and work**

Don't miss this!

Next steps for integrating primary care

Fuller Stocktake report

**What does this new way of working
mean for VCSE organisations?**

**Wednesday 14th June
10-11.30am Teams**

The [Fuller Stocktake](#) is a report commissioned by the Government that outlines a new vision for integrating [primary care](#) in England. The report highlights the critical role of the voluntary, community, and social enterprise (VCSE) sector in delivering integrated primary care and improving population health outcomes. It recommends that [integrated care systems](#) (ICSs) should work closely with VCSE partners to co-design and co-deliver services that meet the needs and preferences of local communities.

This session, hosted by Worcestershire VCSE Alliance will provide an overview of the findings from the Fuller Stocktake report and look at existing collaborations between [Primary Care Networks](#) (PCN) and the sector.

We will cover -

- What this new way of working means for Voluntary, Community and Social Enterprise sector organisations.
- How can the sector play a part in building integrated teams in every neighbourhood?
- How Primary Care Networks are working with the sector already, with an opportunity to hear from some of our local PCNs.

Join us for insights from -

[Hollie Hastings](#) – Director of Strategy and Partnerships, Worcestershire Primary Care Networks.

[Ruth Lemiech](#) Director of Place Development, Worcestershire.

A number of Primary Care Network Managers from across the county.
